📍 Dasmariñas City, Cavite, Philippines

Summary

Web designer and developer with strong skills in front-end and back-end development, creating responsive and high-performing websites. Known for problem-solving ability and a continuous learning mindset, focused on delivering user-friendly digital experiences that meet business goals. Ready to contribute to an organization's growth by combining technical expertise and creative insights to build impactful, high-performing websites.

Experience

Online IT / Websites Made Easy

Senior Web Developer

November, 2024 - Present

In my current role as a Senior Web Developer, I lead end-to-end website development projects, directly collaborating with clients to ensure their business needs are translated into functional, optimized, and visually compelling websites. I manage technical execution, performance optimization, and reporting to maintain client satisfaction and deliver measurable results.

- Leading website architecture planning and ensuring scalability, speed, and security of all projects.
- Directly communicating with clients to gather requirements, provide updates, and ensure project alignment.
- Overseeing code quality, conducting troubleshooting and debugging to maintain high performance.
- Managing multiple projects simultaneously and ensuring timely delivery.

Affinity Express, Inc.

Web Developer / Designer

July, 2022 - November, 2024

In my role as a website developer, I reported to the WebDev Team and manager and held various responsibilities. These included creating mockup designs for websites, developing websites that are compatible across different devices ranging from phones to desktops, resolving escalated client's complaints, reviewing and revising websites, and ensuring optimal website performance through maintenance and optimization efforts and also training a team on best practices.

- Developing website for small to large business internationally using Elementor pro, DIVI builder, Bricks, and other CMS.
- Formulated a sophisticated and user friendly web design mockup and prototype using Adobe Creative Suite especially Adobe Photoshop.
- Implementing SEO on the website and also creating email marketing to boost visitor in the client's website.
- HTML code and debugging existing email marketing campaigns to ensure cross-client compatibility, responsiveness, and optimal performance.
- Maintaining and optimizing the performance of the website.

Meristone I.T Services

Back-end Developer

March, 2021 - July, 2022

As a Backend Developer, I was responsible for revising and optimizing PHP code to improve the performance, functionality, and security of web applications. I handled troubleshooting and resolving technical issues, ensuring the seamless operation of the website system. Additionally, I developed and maintained custom PHP code to support and enhance various backend features, collaborating closely with frontend developers to deliver a cohesive and efficient user experience.

- Revision and maintenance for their websites.
- Maintained and updating an inventory correctly every week.
- Created a factory quote system.
